

Caring for Carcinoid Foundation

E-Update: Number 5, 2006

NECN Interview

The Caring for Carcinoid Foundation is featured in a primetime interview with the "Chet Curtis Report" on New England Cable News (NECN). NECN is the country's largest regional news network, serving more than 3 million homes.

The interview features [Nancy O'Hagan](#), Founder and President of the Caring for Carcinoid Foundation, and [Dr. Matthew Kulke](#), a member of our Board of Scientific Advisors. They discuss the Caring for Carcinoid Foundation's mission to discover a cure for carcinoid.

The "Chet Curtis Report" is a nightly news program anchored by veteran journalist, Chet Curtis. The program offers high-profile, in-depth and exclusive interviews. Some of the newsmakers who have appeared on the "Chet Curtis Report" include U.S. Supreme Court Justice Stephen Breyer, White House Chief of Staff Andrew Card, and U.S. House Minority Leader Nancy Pelosi.

New Member of Board of Directors

The Caring for Carcinoid Foundation is honored to announce Eric Peacock as a new member of our Board of Directors. Eric brings strong commitment to discovering a cure for carcinoid:

"The genetic basis of carcinoid cancer can be identified and a cure for the disease can be found. It requires the engagement and coordinated efforts of top researchers around the world, access to the most advanced scientific tools and technology, and the financial resources required to fund aggressive research. None of us could achieve this alone, but by supporting the Caring for Carcinoid Foundation we have the opportunity to make all of this happen in a timeframe measured in years, not decades. I am honored to be part of the Caring for Carcinoid Foundation and look forward to the day when we gather to celebrate the accomplishment of its mission - a cure for carcinoid cancer."

Eric is Director of Alliance Management and Business Development at [Perlegen Sciences](#). The mission of Perlegen Sciences is the following:

"Perlegen Sciences, Inc. is working to provide safe and effective medicines to patients worldwide. We quickly and cost effectively analyze more than one million genetic variations in clinical trial participants to explain and predict the efficacy and adverse effect profiles of prescription drugs. Perlegen also applies this expertise to discovering genetic variations associated with disease in order to pave the way for new therapeutics and diagnostics. For years, scientists and drug manufacturers have been eager to comprehensively examine entire genomes; through Perlegen,

their moment has come."

In addition, Eric's educational background is the following:

- B.A., Harvard University, *magna cum laude*
- M.B.A., Stanford University Graduate School of Business

The Caring for Carcinoid Foundation is grateful that Eric has joined our team and will help us discover a cure for carcinoid.

Donations

Thank you to our [donors](#) for their generosity. 100% of all donations to the Caring for Carcinoid Foundation fund our research grants. Quite simply--the more money we raise, the more research grants we award. We depend on your generosity to achieve our mission of discovering a cure for carcinoid.
